The Tailored, Interactive Software for Immersive Experiences

Beautiful Applications, One Software.

At its core, smartPerform is a standard interaction software which allows you the ability to create interactive, multi-touch enabled brand experiences or immersive conferencing environments. smartPerform runs on Windows operating systems as a desktop application. Its editing mode allows the creation of stunning applications in a What You See Is What You Get manner (WYSIWYG). The play-out component (presentation mode) provides a kiosk-like operation to prevent interacting with applications outside of smartPerform.

Supported Media Formats

Graphics: *.png, *.jpg, *.tiff, *.bmp, *.gif

Video: *.wmv, *.mp4, *.mov, *.flv, etc

Office(2007+): *.ppt, *.pptx, *.xls, *.xlsx, *.pdf, *.xps

Applications: *.exe and *.lnk

Live Video: DirectShow Video

Flash: *.swf, *.flv

Features

smartPerform integrates a variety of file types in a zoomable user interface. The design can be configured purely on a graphical level, without the need for any programming. Pro features, such as the Logic Designer, provide an interface to the world outside of smartPerform with network or sensor interaction.

Languages

English*, German, Chinese.
